

MIDWEST

What makes a Midwest Snip unique

Longest Lasting

Blades are austemper heat treated, producing a hardened cutting edge that outlasts all others.

Stay Adjusted

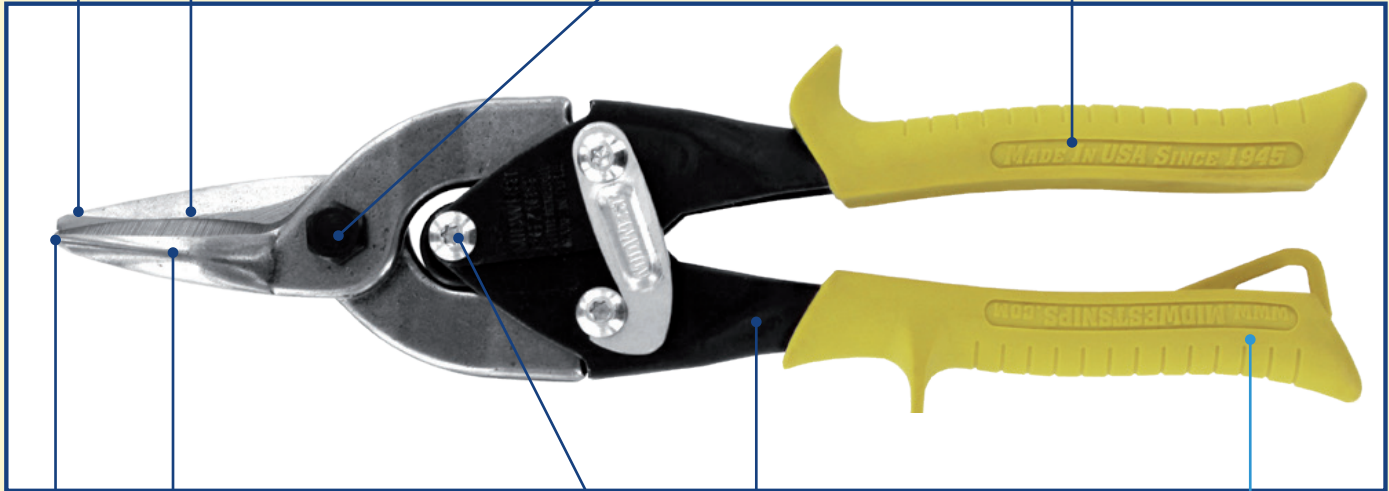

Grade-8 hardened center pivot bolt threaded into back blade maintains adjustment for optimum cutting.

No Slip or Scar

40 blade serrations per 1" (2.54 cm) grip without slip or scar.

Comfortable Grips

Soft and durable copolymer grips won't twist or wear through.

Unbreakable Blades

Hot drop-forged molybdenum alloy steel blades are virtually unbreakable and provide long-lasting edge life. Withstand a force over 7,000 pounds by putting pressure on the shanks.

No-Bend Handles

Heavy gauge steel handles maximize force into cutting power at blades.

Easy To Grip/Close

Ergonomically optimum 5.5" (140 mm) handle opening.

Easiest To Use

Full length pinch to point cuts up to 1,24 mm Cold-Rolled Sheet Metal or 0,78 mm Stainless Steel Sheet Metal, with less than 80 lbs. (36 kg.) of hand pressure.

Heavy-Duty Spring

Unbreakable double overwind spring is guaranteed forever. Exceeded 120,000 cutting strokes without failure.
